Mobile Applications

Agile Methodologies

Vladimir Chernenko

Back End Developer

Brno

Summary

I'm experienced web and mobile developer.

My development experience consists of

1. Backend services in Python - rest API, graphql, + support them
with tests

2. Frontend - vuejs

3. Flutter - I've built few mobile apps and I think flutter is future of
mobile development

4. Basic devops - docker + compose, Kubernetes, google cloud,
terraform

5. Databases - PostgreSQL

7. Self and project management - I was working on few personal
projects and on a few corporate ones, words like MVP, agile, sprints
are familiar to me.

Experience

Accomango
Back End Developer
September 2021 - October 2021 (2 months)
Brno, South Moravia, Czechia

During my short cooperation with Accomango I was exploring how we could
improve their DevOps setup.

As the result I've prepared few ready-to-apply documents about setup
improvements. Few topics which were covered there:

- RBAC in Kubernetes

- Centralized logging for K8s

- General vision for infrastructure

Kiwi.com
4 years 5 months

Development Team Lead
October 2020 - September 2021 (1 year)
Brno, South Moravia, Czechia

Leading team of 3 developers with all batteries included:

1. Agile - plannings, groomings, estimations and etc.

2. Knowledge share across team members

3. Eliminating bus factor for multiple project and work balancing

4. Improving overall codebase quality - introducing new architectural ideas and more

Senior automation developer
May 2017 - October 2020 (3 years 6 months)
District Brno-City, Czech Republic

We were working on several project which are supporting customer support day to day work.

1. Automating "boring" stuff

2. Implementing cross services communication mainly in a form of backend API

3. Collaboration with our frontend team and deliver products that helps resolve companies business needs - reducing handling time and amount of steps of task processing

firmo.cz
Python Developer
April 2016 - May 2017 (1 year 2 months)
District Brno-City, Czech Republic

I was a member of 2 devs team on Django project with separated frontend. My goal was to add new features on backend project itself, as long as support distributed scraping processing via celery and rabbitmq.

C.S.G. Software Group Limited
Junior Software Engineer
April 2015 - April 2016 (1 year 1 month)
District Brno-City, Czech Republic

Education

Brno University of Technology
Bachelor's degree, Information Technology · (2013 - 2017)
